

# CODBLE IT SOLUTIONS

Enterprise-Grade IT, Cybersecurity,  
GRC & Infrastructure Services

- ✓ Securing digital infrastructure.
- ✓ Enabling scalable, resilient enterprise growth.

# WHO WE ARE

**Codble IT Solutions** is an India-based IT and cybersecurity services firm delivering secure, **scalable, and enterprise-ready technology solutions**, including **GRC and compliance services**.

We partner with organizations to modernize IT environments, mitigate cyber risk, and support long-term digital transformation.

## Enterprise Market Challenges

- Escalating cyber threats and ransomware.
- Increasing regulatory, audit, and compliance pressure.
- Complex, multi-vendor IT and network environments.
- Limited visibility across endpoint, cloud, network, and industrial systems.

## Impact:

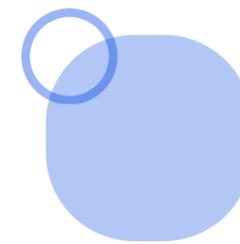

**Business disruption, operational risk, and loss of trust.**

# Our Vision

To be a **trusted enterprise technology and compliance partner**, enabling organizations to operate securely, remain compliant, and scale confidently in a highly regulated digital world.

# Our Mission

To deliver **security-first, compliance-driven, and scalable IT solutions** that protect critical business operations, reduce regulatory and cyber risk, and create long-term enterprise value.

# OUR SERVICES

## IT & Digital Infrastructure

Enterprise IT systems, end-user devices, servers, storage & lifecycle management.

## Cybersecurity & GRC

Endpoint, network, cloud, OT/IoT security with governance, risk & compliance services.

## Managed Services & Manpower

Resource augmentation, managed IT, security operations & ongoing support.

## Networking & Connectivity

Structured LAN & fiber cabling, switches, access points, racks, testing & optimization.

## Data Center & Power Solutions

Racks, PAC, PDU, fire suppression, monitoring, electrical & power infrastructure.

# Comprehensive Security & Compliance Coverage

**Endpoint Security:** EDR/XDR, asset visibility, device protection, endpoint hardening, and compliance monitoring.

**Network Security:** Next-generation firewalls, secure connectivity, segmentation, IDS/IPS, and secure remote access.

**Cloud Security:** Workload protection, secure access, configuration monitoring, posture management, and data protection.

**Identity & Access Management (IAM):** MFA, authentication and authorization, privileged access management, identity lifecycle, and encryption.

**OT / IoT Security:** Asset discovery, protection for industrial and connected devices, network isolation, and anomaly detection.

**GRC & Compliance:** Governance, risk management, compliance alignment, audit readiness, policies, and continuous monitoring.

**Threat Management & Monitoring:** Security monitoring, incident detection and response, threat intelligence, log management, and SOC operations.

**Data Security & Privacy:** Data classification, DLP, encryption at rest and in transit, and privacy compliance.

# Integrated Enterprise Solution Model

**Codble IT delivers end-to-end IT, Cybersecurity, GRC, and Infrastructure services, covering:**

## **IT & Enterprise Infrastructure**

- IT infrastructure design & lifecycle management.
- Network, server, and system integration.
- Enterprise IT consulting & managed support.
- Hardware, software, and network deployment.

## **Cybersecurity**

- Endpoint, network, cloud, and identity security.
- Threat detection, response, and continuous monitoring.

## **GRC (Governance, Risk & Compliance) Services**

- Security governance framework design.
- IT & cyber risk assessment and risk treatment.
- Regulatory compliance support & audit readiness.
- Policy, SOP, and control implementation.

**Design principle:**

**Security-first, scalable, and compliance-ready.**

# End-to-End Physical & Digital Infrastructure

**Codble IT supports large facilities, warehouses, and industrial environments with:**

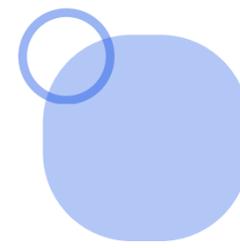

- Complete **warehouse IT infrastructure design & deployment.**
- Structured cabling & secure network connectivity.
- **UPS, power backup & redundancy solutions.**
- **CCTV surveillance, access control & monitoring systems.**
- Secure integration of IT, OT, and IoT environments.

Designed for **high availability, safety, and operational continuity.**

## **Target Customers**

- Mid-market & enterprise organizations.
- Logistics, warehousing & supply-chain operators.
- Manufacturing & industrial enterprises.
- Retail chains and multi-location businesses.

# It Products & Manpower

## IT Products Supply

- **End-user devices:** Laptops, Desktops, Workstations & Peripherals, HHD, Thermal Printers, Wireless Scanners.
- **Printing & scanning:** A4/A3 Printers, Barcode Printers, Scanners.
- **Network & security hardware:** Firewalls, Switches, Routers, Wireless Solutions.
- **Servers, storage & data center components.**
- **Surveillance & access control systems.**

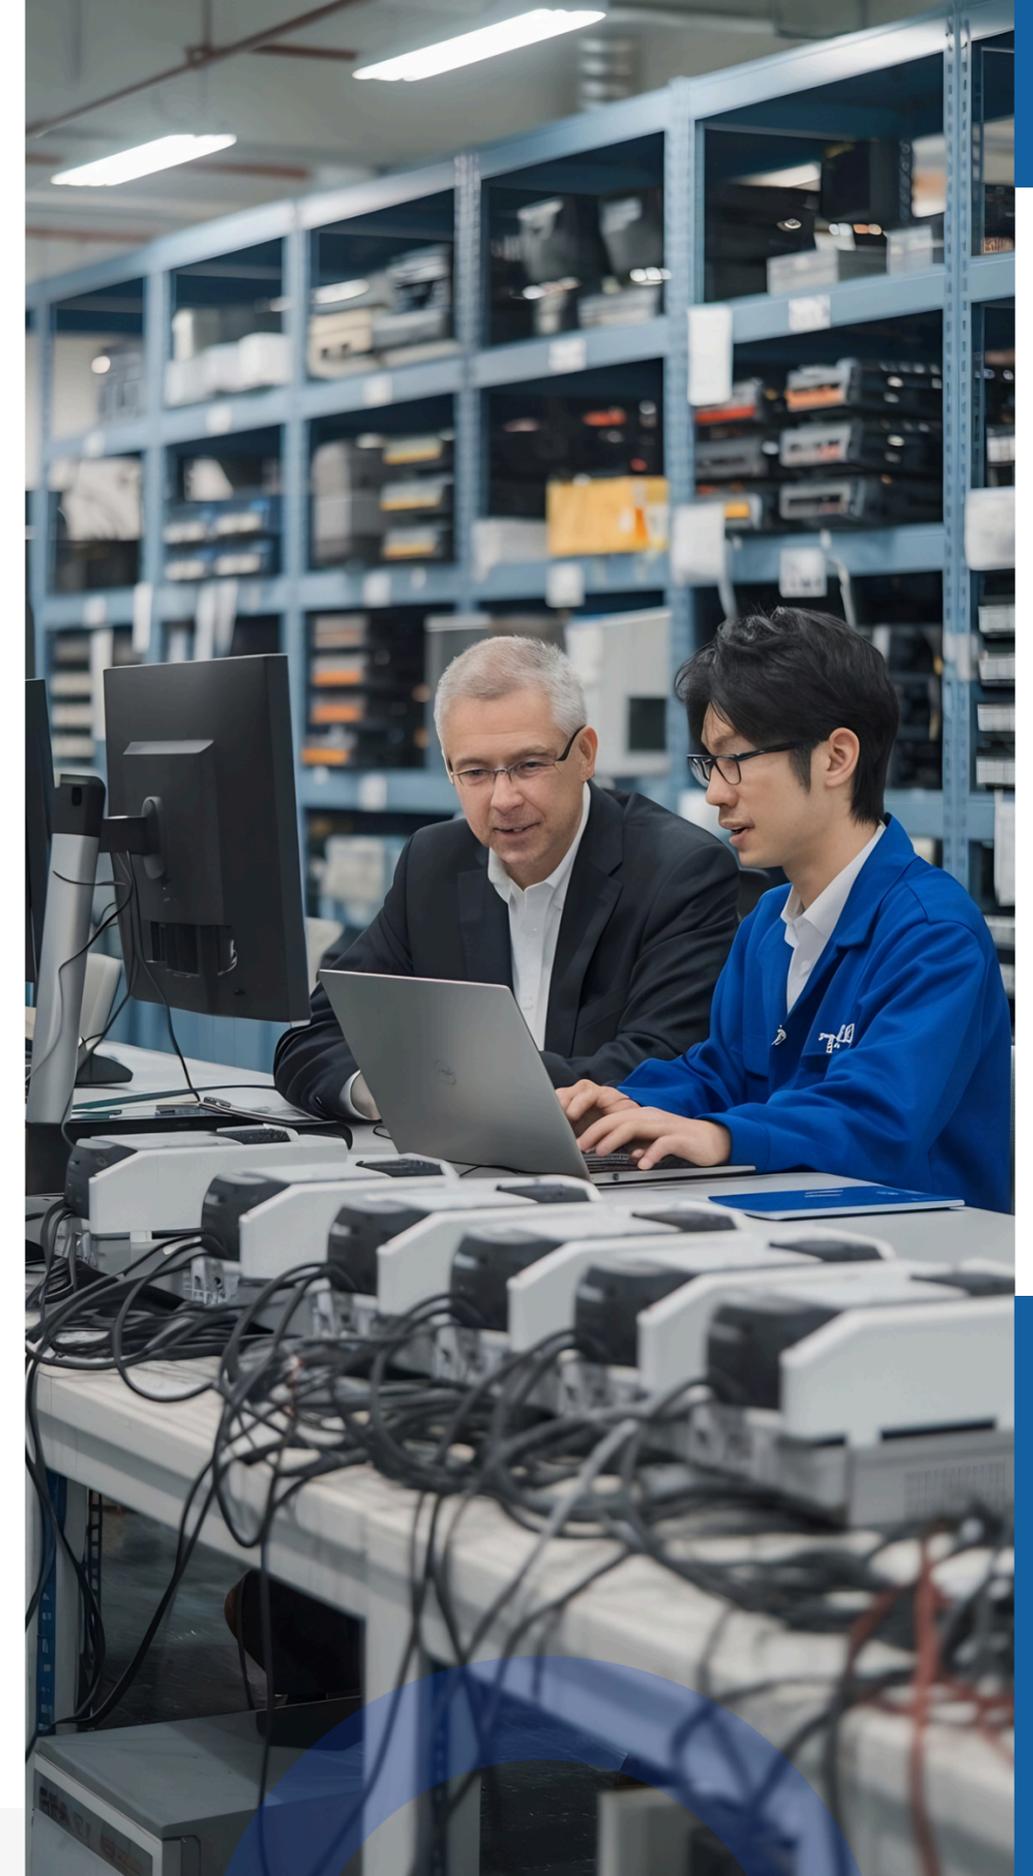

Delivered with **deployment, integration, warranty, and lifecycle support.**

## MANPOWER & MANAGED SERVICES

- **Network & Security Engineers.**
- **SOC Analysts & Cybersecurity Specialists.**
- **GRC Consultants & Compliance Auditors.**
- **Infrastructure & System Administrators.**
- **Software Development Teams.**

(Full-stack, backend, frontend, and application support)

**Engagement Models: Project-based | Long-term deployment |  
Managed teams | On-demand scaling**

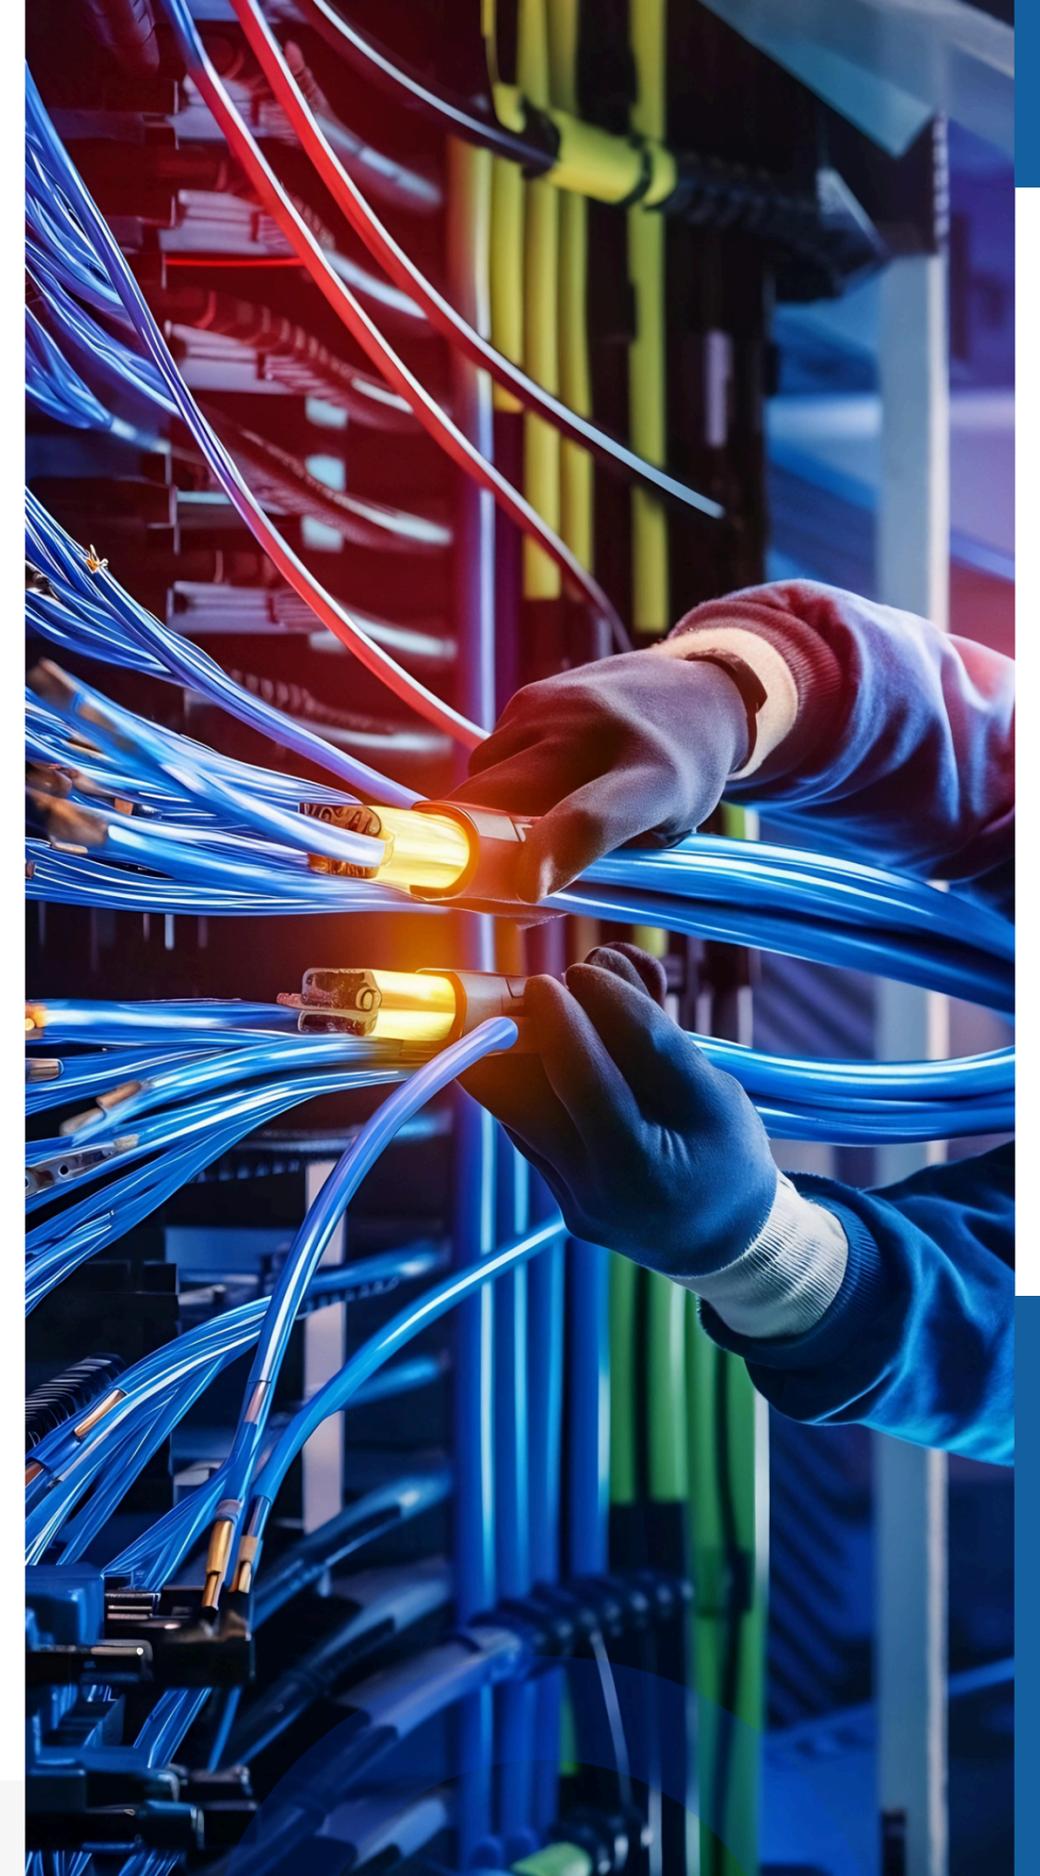

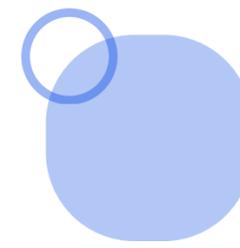

# Electrical Projects & Power Infrastructure

- Electrical panels with **MCCB, MCB & motorized switchgear.**
- **Electrical distribution boards** (main & sub).
- **Point wiring** with switches & sockets.
- **Structured electrical cabling** and **cable tray systems.**
- **Electrical safety insulation mats.**
- **Industrial fans** with mounting poles.
- **Industrial lighting solutions:**
  - LED flood lights.
  - Motion-sensor & detector-based lights.
- **Chemical electrode earthing systems.**
  - (Cu-Cu, Cu-GI, GI-GI).
- **Servo stabilizers & isolation transformers.**
- **Power audit & thermography services.**

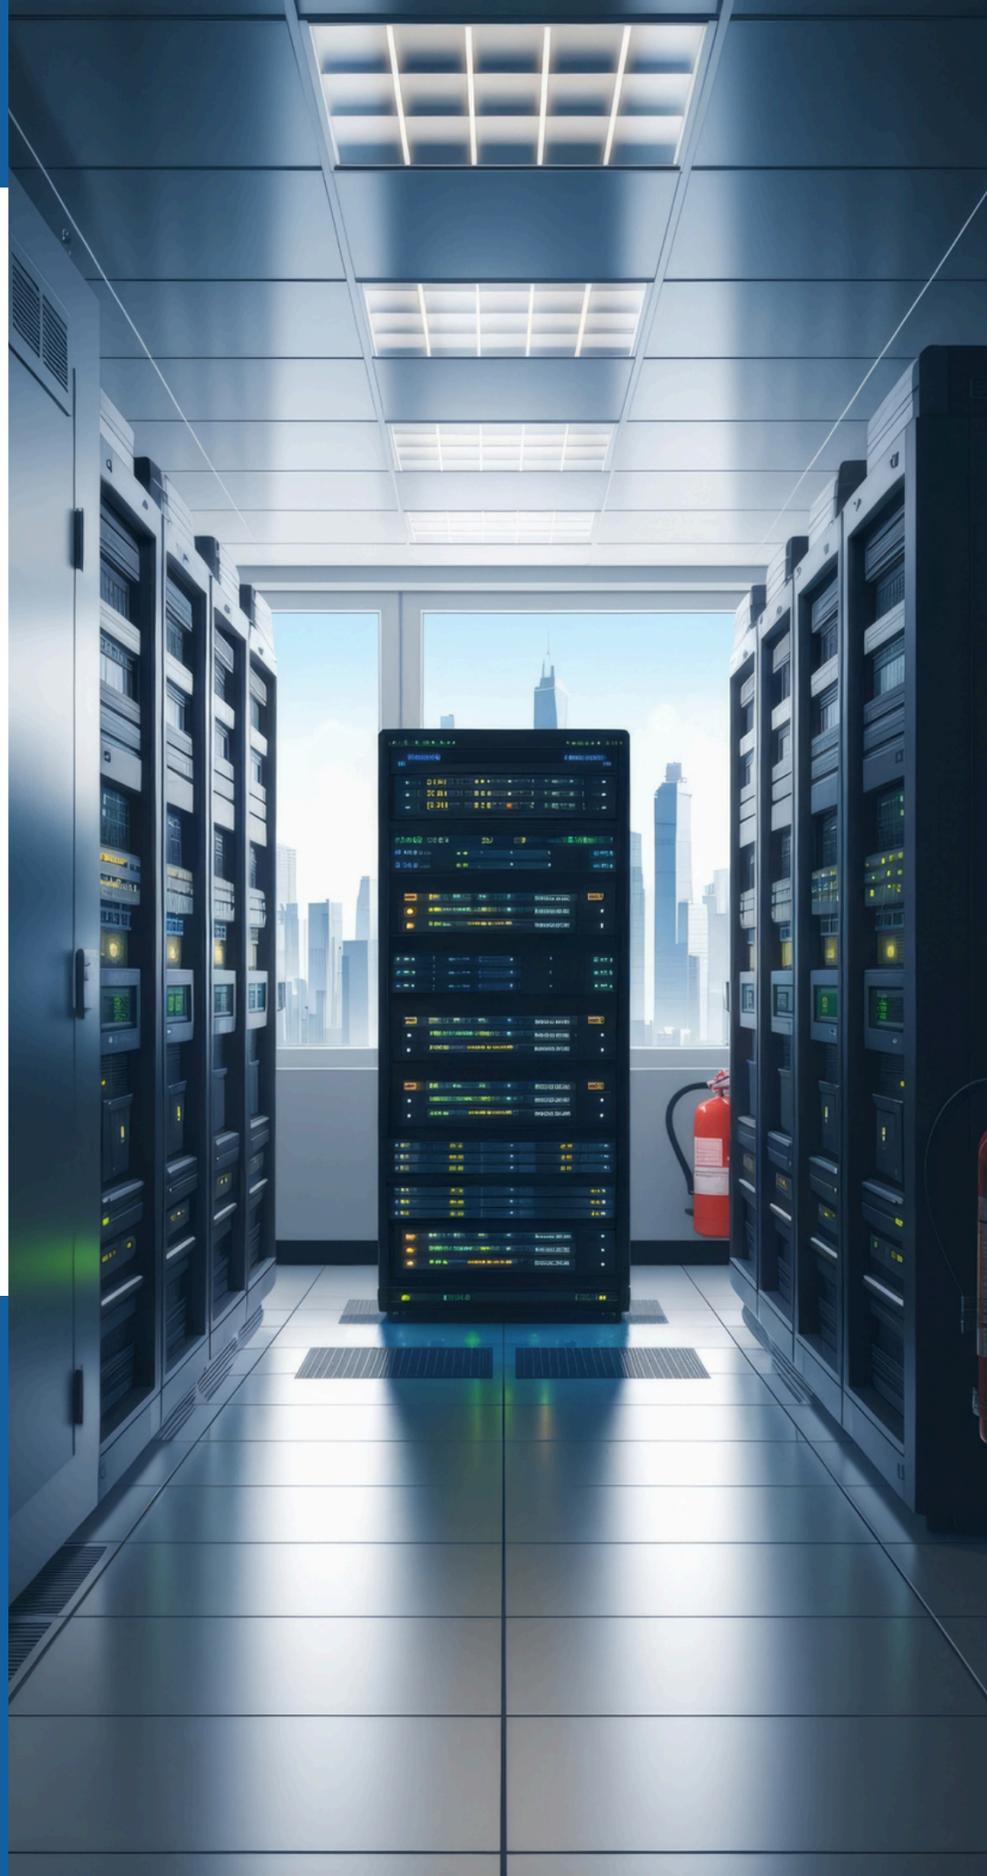

**Delivered with compliant installation, testing, and lifecycle support.**

# Networking Projects

- **LAN cabling & fiber cabling** (single-mode & multi-mode), including **CCTV cabling**.
- **Structured LAN cabling** with proper **I/O outlets & face plates**.
- **LAN cable bundling** using Velcro for organized routing.
- **Cable trays, raceways & conduiting systems**.
- **Access point deployment & configuration**.
- **Networking switches** installation & integration.
- **LAN cable termination** at patch/jack panels & user endpoints.
- **Fiber cable termination** at switches.
- **LAN & server rack** supply, installation & management.
- **Penetration testing** (Pen Testing) for network security assessment.
- **Restructuring & optimization** of legacy cabling environments.

**Executed with industry best practices, minimal downtime, and lifecycle support.**

# Data Center Infrastructure Solutions

- **Server racks** – 42U & 48U. (APC, President, Rittal, NetRack).
- **Network racks:**
  - Open two-post & four-post.
  - Covered racks.
  - Sizes: **6U, 12U, 24U, 42U, 48U.**
- **Power Distribution Units (PDU) & Automatic Transfer Switches (ATS).**
- **Precision Air Conditioning (PAC) systems with Water Leak Detection (WLD).**
- **Environmental Monitoring Unit (EMU) for:**
  - Temperature monitoring.
  - Humidity monitoring.
- **Rodent repellent systems.**
- **Civil infrastructure works:**
  - Raised flooring.
  - False ceiling.
- **Fire-rated doors.**
- **Fire detection & suppression systems**(Clean Agent & CO<sub>2</sub> gas based).
- **Smart rack solutions for warehouse & industrial segments.**

**Delivered with compliant design, installation, testing, and lifecycle support.**

# WHY CODBLE IT

- ✔ Security-first and compliance-driven approach.
- ✔ Expertise across IT, Cybersecurity, GRC & Infrastructure.
- ✔ OEM-aligned best-of-breed technologies.
- ✔ Scalable solutions for complex, regulated environments.
- ✔ Long-term partnership and managed services mindset.

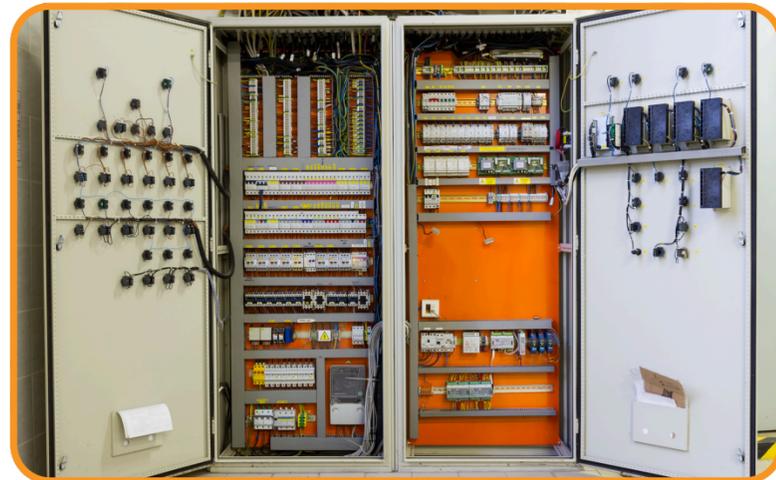

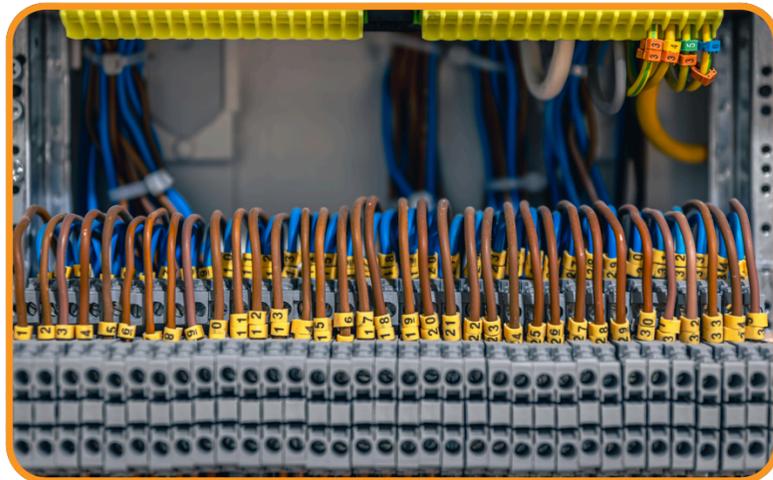

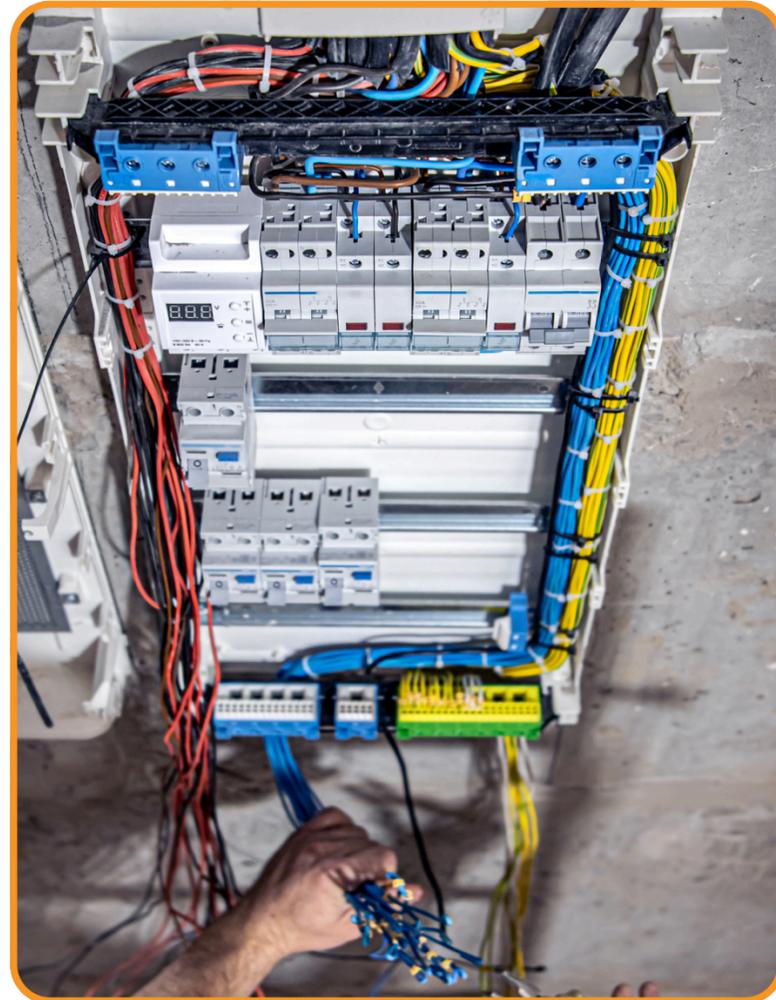

## Growth Opportunity

- Rising enterprise cybersecurity & compliance investment.
- Cloud, network, and infrastructure modernization.
- GRC becoming a board-level and regulatory priority.
- Strong potential for recurring managed security & compliance services.

## Building Secure & Compliant Digital Enterprises

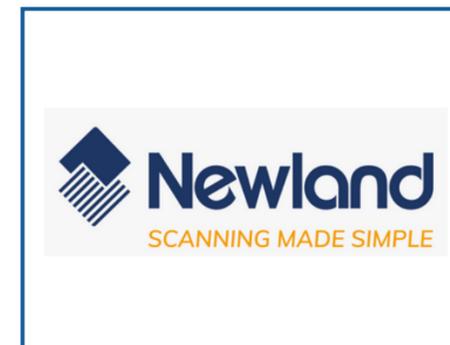

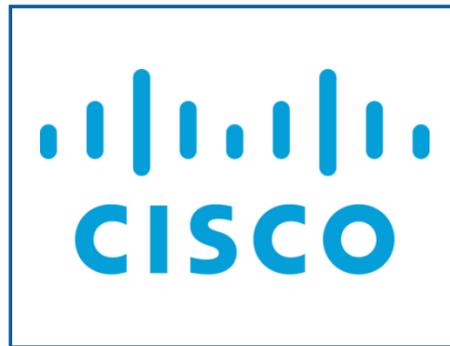

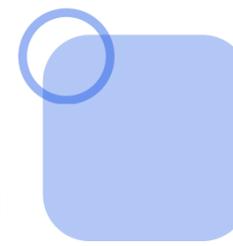

**Codble IT** enables organizations to **operate securely, remain compliant, and scale confidently** across **IT, cloud, network, and industrial environments**.
